To Whom It May Concern:

I am writing this letter of recommendation in regards to Jason Arant. Jason has served as a 6th grade teacher in science, social studies, and math at Central Intermediate for the past two school years. He also has the added responsibilities of Morning Lab Supervisor, which is a position that allows students to come in a couple of days a week for additional academic support when homework is not completed.

Something that strikes the observer immediately about Mr. Arant is the discipline he has instilled in his students. Watching him interact with the students in his classes, you would see how his past experience as a teacher and mentor has molded his classroom management. Students demonstrate respect in his class, and even students who struggle with behavior in other classes are well behaved and follow instructions. Mr. Arant has also shown a willingness to help the school climate in whatever way possible to ensure student safety and an excellence in education. He takes the time to build relationships with his students and seeks to find ways to reach them when they are struggling academically and behaviorally. It is an extremely rare instance that he has to refer students to the office because the students want to stay in his class, are eager to learn, and display an enthusiasm for math. Something that stands out to me about Jason is at the beginning of the year, he will go out to the cars picking up his students and take the time to introduce himself to the parents. He sets up a positive relationship with the families in an effort to influence the development of the whole child, not just the academic side of the student.

Jason Arant would be an asset to your school and district. He is a dedicated, self-starter who is able to relate to students at all levels. He has a willingness to commit the time necessary for the job he is entrusted to do. He is an active member of the Bixby community through his own children's extracurricular activities and by living in the community.

I would be happy to talk to you further, if necessary, regarding Jason and how he might benefit your school. You may reach me at (918)-724-4934 or (918)-366-2261.
